

TRACY CHACON

Full-Stack Software Engineer

San Antonio, TX • [tracychacon-portfolio-site](#) • [github.com/tracychacon](#) • [linkedin.com/tracychacon](#)

PROFESSIONAL SUMMARY

Adaptable Software Engineer and Operations Specialist with hands-on experience engineering full-stack web applications, modern backend APIs, and reproducible development environments. Combines technical proficiency in React, Next.js, TypeScript, Node.js, Ruby on Rails, and Docker to build performant, reliable, and scalable software solutions.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), C#, Ruby, SQL (PostgreSQL), HTML5, CSS3/Tailwind
Frameworks & Tools: React, Next.js, Node.js, Ruby on Rails, RESTful APIs, Git, Docker, Docker Compose
Architecture & Systems: Relational Database Design, Query Optimization, Linux/Ubuntu Environments, Shell Automation

SOFTWARE ENGINEERING & DEVELOPMENT PROJECTS

Project Dashboard Sandbox [Next.js, TypeScript, React, PostgreSQL]

- Architected interactive interface mockups for clearance scoping and workflow tracking, enabling dynamic permission shifting from standard Loan Officers down to Risk Agents.
- Implemented modular component structures utilizing Next.js App Router and Server Actions for optimized state responsiveness.
- Configured connection pooling and relational database schemas to maintain secure state across session boundaries.

circito-scheduler [Next.js, Node.js, Docker, PostgreSQL, Vercel]

- Engineered a self-hosted appointment scheduling platform leveraging modular Component Architecture and robust State Management to manage concurrent reservation requests without race conditions.
- Containerized the complete application stack using Docker Compose and integrated native PostgreSQL database drivers for predictable local environments alongside automated cloud deployments on Vercel.
- Designed atomic concurrency lock keys, custom migration scripts, and streamlined CI/CD workflows to guarantee absolute data consistency across client booking slots.

Personal Portfolio & Web Architecture Migration [Next.js, TypeScript, React, GitHub Pages]

- Migrated static landing page infrastructure into a modular Next.js static site generator optimized for automated GitHub Pages deployment pipelines.
- Enhanced performance, web accessibility, and responsive rendering across various mobile and desktop viewport specifications.
- Integrated clean custom styling layouts and asset structures to maintain lightweight client bundle footprints.

WORK EXPERIENCE

Private Family Caregiver

San Antonio, TX | Aug 2024 – Present

- Manage complex medical schedules, diet planning, and health metrics coordination with medical professionals to ensure absolute continuity of care.

Rideshare Driver / Small Business Logistics Partner — Uber

San Antonio, TX | Aug 2021 – Present

- **Customer Experience & Optimization:** Deliver tailored communication to diverse clientele while managing business schedules, vehicle diagnostics, and preventative maintenance.

Residential Mortgage Loan Officer

San Antonio, TX | Prior Experience

Guided clients through complex loan structures, financial documentation, and strict regulatory compliance requirements.

Electrician

San Antonio, TX | Prior Experience

Installed, inspected, and maintained critical electrical infrastructure according to regional engineering codes and safety standards.

Military Police Officer — U.S. Armed Forces

Prior Experience

Executed physical security measures, risk assessment protocols, and law enforcement operations in high-stress, high-consequence environments.

CERTIFICATIONS

- Responsive Web Design Certification – freeCodeCamp
- Foundational C# with Microsoft Certification – freeCodeCamp / Microsoft
- JavaScript Algorithms and Data Structures V8 Certification – freeCodeCamp
- Relational Database V8 Certification – freeCodeCamp
- Back-End Development and APIs V8 Certification – freeCodeCamp
